Re: RCRA Permit - Part A
Amana Refrigeration, Inc.

Dear Mr. Evans:

Enclosed for your review is one (1) copy each of EPA forms 3510-1 and 3510-3 with the required attachments. Also enclosed is one (1) copy of a support document which defines each of the wastes which was included on the original Part A application. Note that this document defines the source of each waste, illustrates its general characteristics, defines the method in which the waste is handled and finally, states the reason with applicable reference why the waste is or is not included on the revised application.

If tests are required on some of Amana's wastes in order to complete Part B, we will be facing a tight schedule. Therefore, we respectfully request that you review this material at your earliest convenience. If you have any questions do not hesitate to give us a call. If necessary, we will be happy to meet with you in your office if it will help to expedite this matter.

Very truly yours,

Gene H. Fritch
